Orientalmotor

Item # AZD-KX, AZ Series Closed Loop Driver with RS-485 Communication (24/48 VDC)

αSTEP

Pulse driver with RS-485 communications for monitoring such motor actions as position, torque output, speed, alarms and temperature. Wire the driver up for conventional Pulse and Direction control. Use the RS-485 connection for monitoring back to your host PLC.

The AZD driver contributes to quick positioning operations over a short distance while providing smooth performance.

CE

Specifications	—
